

The **easiest** to use **17th Edition** multifunction tester – The **KT64DL**

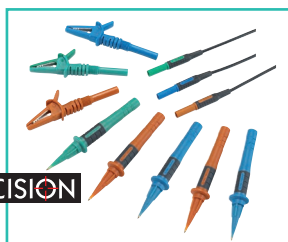

The **KT64DL** is a straight forward robust instrument for the professional electrician

TESTING SIMPLIFIED

1. Easy interface
2. Fast loop (no trip)
3. RCD auto-tests – results all on one screen

4. Professional Robust 'G7' test leads with GS38 probe tips and finger guards

5. Rugged construction with lid and carry case

- Continuity Test with auto-null
- Auto-null value remembered even when switched off
- 250V, 500V, 1000V insulation test. LED shows when a high test voltage is present and when the circuit is still discharging
- High and Low test current loop impedance - bypasses all types of RCDs
- Separate PSC/PFC function with clear indication of which circuit is being measured
- Comprehensive RCD Test. An RCD auto-test automatically runs through the 6 tests that are required whilst you only have to stand by the RCD and reset each time.
- Ramp test for solving nuisance tripping problems
